Raihan Uddin

Principal Software Engineer | Java & Spring Boot

Dhaka, Bangladesh +8801749948344 raihanuddin561@gmail.com raihanuddin561 raihanuddin561

Summary

Principal Software Engineer with 7+ years of experience designing, building, and leading enterprise-grade backend systems using **Java (11–21)** and **Spring Boot**. Deep expertise in REST API and Backend-for-Frontend architecture, service-layer design, Spring Data JPA, and relational data modelling. Track record of leading modernization initiatives, resolving complex production issues, and mentoring junior engineers on globally distributed teams. Applies agentic AI development workflows to accelerate delivery while retaining architectural ownership and quality control.

Technical Skills

Languages: Java (11–21), SQL, TypeScript, JavaScript
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, BFF Architecture
Databases: PostgreSQL, MySQL, MongoDB **Testing**: JUnit 5, Mockito, Unit & Integration Testing, Jest
Full-Stack: Next.js, React, Prisma ORM **API Design**: Swagger/OpenAPI, API Versioning
Tools & DevOps: Docker, CI/CD (GitHub Actions), Git, Linux, Maven, Gradle, Postman, Jira
AI-Assisted Engineering: Claude Code, agentic development workflows, specification-driven prompting, AI code review
Practices: SDLC, Agile/Scrum, Design Patterns, SOLID Principles, Code Review, Technical Leadership, Mentoring

Experience

BJIT Ltd. – *Dhaka, Bangladesh* **Aug 2021 – Present**

Principal Software Engineer *Jul 2026 – Present*

- Lead backend architecture and technical direction for enterprise services, spanning API design, service structure, and maintainability.
- Review backend designs and code across the team to uphold engineering standards and consistency.
- Apply agentic AI coding tools with specification-first prompting and rigorous review to accelerate delivery.

Senior Software Engineer *Aug 2023 – Jun 2026*

- Designed and developed Backend-for-Frontend (BFF) services using **Java 21** and **Spring Boot** for enterprise SaaS platforms.
- Built and maintained RESTful APIs with enterprise-standard authentication and authorization, documented via Swagger/OpenAPI.
- Led modernization of legacy enterprise applications, improving maintainability, scalability, and performance.
- Applied Spring Data JPA and Hibernate for data access, query tuning, and transaction management.
- Diagnosed and resolved complex production incidents through root cause analysis and performance tuning.
- Mentored junior engineers through code reviews, pair programming, and technical guidance.

Software Engineer *Aug 2021 – Jul 2023*

- Developed and maintained backend features and REST endpoints using Java and Spring Boot in Agile teams.

ServicEngine Ltd. **Feb 2020 – Aug 2021**
Software Engineer (Java) *Dhaka, Bangladesh*

- Developed enterprise HR and payroll systems using Java, Spring Boot, MySQL, and React.
- Optimized SQL queries and database schemas to improve application performance and data consistency.
- Wrote unit and integration tests with JUnit alongside business analysts and QA within Agile cycles.

Merinasoft Ltd. **May 2019 – Jan 2020**
Software Developer (Java) *Dhaka, Bangladesh*

- Developed POS and billing applications using Java and MySQL, maintaining stability through debugging and performance tuning.

Projects

SkyZoneBD | *Next.js, TypeScript, PostgreSQL, Prisma, Vercel* github.com/raihanuddin561/skyzonebd

- Built a production-deployed B2B wholesale platform with buyer verification, tiered pricing, MOQs, RFQ negotiation, inventory, and a partner profit-sharing ledger.
- Authored the full architecture documentation set, including Architecture Decision Records (ADRs) covering domain model, database design, API contracts, and security.
- Implemented JWT authentication, Zod validation, and Jest unit/integration tests, gated by a GitHub Actions CI pipeline.
- Defined a documented agentic AI engineering workflow — coding standards and PR quality gates — retaining ownership of architecture and review.

B2B E-Commerce Backend | *Java, Spring Boot* (in progress) github.com/raihanuddin561/b2b-ecommerce

- Self-directed Spring Boot backend exploring service-layer structuring and REST API design.

Education

Daffodil International University **Sept 2015 – Dec 2019**
B.Sc. in Software Engineering *Dhaka, Bangladesh*
